

Manifesto

**VOLT is building the Society we deserve,
and the Europe that we need.**

We are a progressive, pan-European political movement dedicated to democracy, human rights and the rule of law.

We all deserve to live in a world that is fair, equitable, safe, inclusive and prosperous, in which our democracies and our economies work for all of us.

We have much more in common with our European neighbours than what separates us, and we are much more effective when we we work together.

Europe can be a unique force for good in an increasingly fragmented and destabilised world.

People of all political persuasions are coming to us because they're tired of infighting between progressive groups, and because they want to be part of something big – something that can make a real impact, and lead to lasting change.

Manifesto

We are under attack by a coalition of anti-democratic forces that want to turn our societies into repressive autocratic regimes, where everything is in the hands of a small number of rich and powerful people, and where the most vulnerable and the less well-off are left behind.

WE ARE NOT GOING TO LET THAT HAPPEN.

WE ARE BUILDING:

A Europe that upholds democracy, human rights and the rule of law at home, and abroad.

A Europe that delivers prosperity, social justice and opportunities to all its people, without discrimination.

A Europe that stands united in facing up to global challenges such as climate change and international conflict.

Manifesto

All across Europe, Volt is an increasingly significant political force. We have MEPs and tens of thousands of members across Europe. We are more than just a movement, we have genuine political traction.

We are influencing the political debate at every level, to embed a strong, values-based agenda that protects our freedoms and provides solutions to the big, shared challenges we all face, from climate change to inequality to tech-enabled authoritarianism.

JOIN US and be part of creating the future we deserve, and the Europe we need.
